Backend Solution

HecCharge

Easy Management of E-Mobility

HecCharge is our new modular cloud solution that makes our services available anywhere, anytime. All charging points are connected to the platform and can be managed and controlled remotely. HecCharge provides an overview of the existing charging infrastructure and displays all relevant data on a dashboard.

HecCharge is also used as a backend management system for the communication between charging point operators, roaming platforms and our payment terminals.

Your Benefits can be combined with:

- ✅ Management of the charging infrastructure (station, charging poinst & user management)
- ✅ Modular design
- ✅ Access around the clock – via tablet, smartphone and notebook
- ✅ Open for third-party systems
- ✅ Certifications for all common industry standards & cloud solutions (e. g. ISO-27001)

Modules/Packages

- ✅ 3rd-Party Payment (core functionality for the integration of 3rd party payment providers)
- ✅ Base (basic functions)
- ✅ Premium (extensive functions)

Combine with

✅ eReady	✅ Payment Terminal HecPay
✅ Payment & Authorization Terminal HecTron	✅ Network Operation HecNet
